iris_scatter.png	Petal Length	virginica	5.66	0.668	20	0.932	scatterplot

FUNCTIONALITY

① Different plot types

Capable of handling A) mean error plots, B) boxplots, C) histograms and D) scatterplots

② Entry of Metadata

Enter sample sizes variable and group names while digitising that are displayed on plot

③ Grouped Data

Enter as many groups as needed to capture descriptive statistics for sub-samples of data

④ Digitise, edit or replot digitisations

Simple user interface to guide user. Can digitise new images, edit digitisations or easily replot previous digitisations and metadata by cycling through images or choosing specific images

⑤ Summarising data

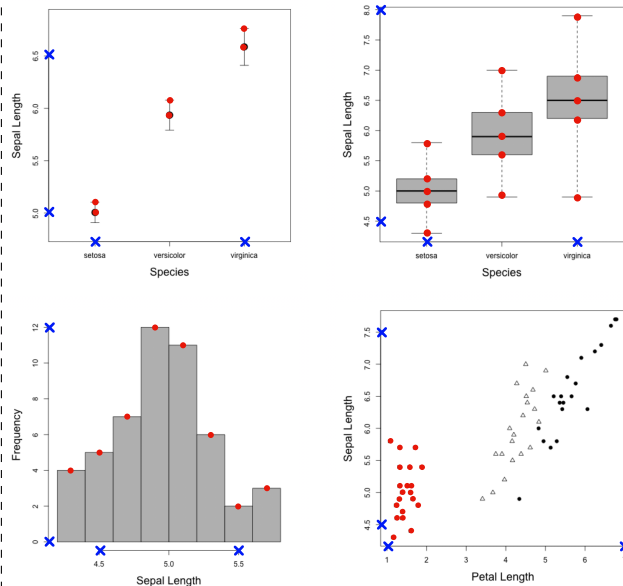

Get descriptive statistics automatically calculated for all plot types or use raw x,y data, if desired

⑥ Multiple image processing

Process as many images at once as needed and of varying types efficiently and quickly. New plots automatically plotted for digitisation
